

# Biology-Genesis

## BIO STICK DRAIN CLEANER AND DEODORIZER FACT SHEET

### Introduction

Domestic and industrial waste are becoming one of the most significant environmental issues facing industry as regulations become more stringent and communities become more aware of air quality issues. Odour pollution and gases from industrial operations or other persistent sources can adversely affect the physical and mental health of nearby residents and workers.

Common problems are: discomfort, health complaints, eye irritations, concerns for children, declines in property values, resulting complaints and litigation from neighbours and regulatory agencies.

Biology-Genesis is an effective, cost efficient and safe solution to deal with some of the world's most intensive problems such as odour, grease trap, septic tank, kitchen sink and vanities in all the food and beverage premises. We promote a productive and sustainable land management practice by allowing you to adopt the 'good neighbour policy' by resolving these problems.

Our core odour treatment applications are in the areas of water treatment, agriculture, industrial and municipal (waste and water), grease trap, septic tank, river and Lake Etc.

### What is Biology-Genesis?

Biology-Genesis is a revolutionary combination of human friendly active microbial, beneficial enzymes, super catalysing co-enzymes and co-factors. It is a natural 100% organic culture without harsh chemicals.

Biology-Genesis digests waste products, comprising of fats, protein, carbohydrates and cellulose that cause organic malodour. Biology-Genesis has dual action (gaseous and substrate) and begins working within minutes.

Biology-Genesis reacts bio-chemically with odour-causing molecules, catalysing their transformation into smell-free non-toxic end products which are consumed in nature.

Biology-Genesis does not mask the odour, it rapidly accelerates achievement of full decomposition by denaturing odour compounds to a fully oxidised state.

Biology-Genesis has been tested by independent laboratories and confirmed to be non-toxic, non-irritating, non-flammable, non-pathogenic and non-hazardous.

### Bio Stick benefits of use:

- Fast acting removal grease, fat, and all organic waste.
- Emitting the odour.
- Cost effective.
- Boots septic system operation.
- To prevent the piping clogging.
- Long residual effective period.
- Reduce gas pressure build up in pipes.
- 100% organic.
- Non-toxic, non-chemical, non-pathogenic.

### Applications

- Kitchen sink
- Bath tubs and showers
- Vanities

### Instruction of use

1. Simply place bio stick to the water sink or toilet urine bowl and etc.
2. After 1 month remove the bio stick from the water.
3. Discard old pellet, take refill new pellet insert in bio stick.
4. Align bio stick back together then replace back into affected area.

### Storage Condition

- Keep in dry place, avoid heat and humid.

### Operative Conditions for Biology-Genesis

PARAMETER	RANGE	BENEFIT
Alkalinity	pH 1.5-9.6	Wide range of operative conditions
Oxygen Content	0.5ppm+	Facultative Anaerobic/Aerobic
Salinity	Up to 65ppt	Effective in saline condition
Temperature	0 - 65°C	Wide temperature range
Chlorine	Up to 3ppm	Operative in moderate chlorine condition

An odour is a volatilised chemical compound, generally at a very low concentration, which humans and other animals perceive by the sense of olfaction.

Odours are normally the result of inorganic gaseous emissions (e.g. hydrogen sulphide or ammonia) or organic vapours, which are released or escape into the local environment.

Specific odours can represent a health risk. For example hydrogen sulphide gas, generated by both chemical and biological processes can be toxic.

Biology-Genesis is the most effective, cost efficient and safe solutions for immediate odour relief to some of the world's most intensive odour problems.
