

# Biology-Genesis

## Hotel clean management

### Introduction

Cleaning process is part of our daily life activities which involve from household, commercial building, hotel and amusement premises. However we are used to the conventional chemical cleaning process started from detergents, solvents, degreasers and other chemical cleaning agents, but all these agents contain harmful substances which will have long term effect to our eco system and marine life. The negative impact have caused a huge hazard to the environment and human health.

Biology Genesis cleaning product has been designed to maximize efficacy and minimize environmental impact without substituting performance or increasing cost. Our solution proven win-win benefits to cleaning businesses, households and healthy environments for today and future generations to come.

### What is Biology-Genesis?

Biology-Genesis is a revolutionary combination of human friendly active microbial, beneficial enzymes, super catalysing co-enzymes and co-factors. It is a natural 100% organic culture without harsh chemicals.

Biology-Genesis digests waste products, comprising of fats, protein, carbohydrates and cellulose that cause organic malodour. Biology-Genesis has dual action (gaseous and substrate) and begins working within minutes.

Biology-Genesis reacts bio-chemically with odour-causing molecules, catalysing their transformation into smell-free non-toxic end products which are consumed in nature.

Biology-Genesis does not mask the odour, it rapidly accelerates achievement of full decomposition by denaturing odour compounds to a fully oxidised state.

Biology-Genesis has been tested by independent laboratories and confirmed to be non-toxic, non-irritating, non-flammable, non-pathogenic and non-hazardous.

### Biology-Genesis benefits include:

- Fast acting
- Removes rather than masks odour
- Cost effective
- Operative at low dosage rates
- Wide range of operative conditions
- Long residual effective period
- Natural anti-microbial action – sanitises as it works
- 100% organic
- Non-toxic, non-chemical, non-pathogenic

### Applications

- General Odour Treatment
- Offensive smell
- Toilet cleaning
- Rubbish collection room
- Sewage pipe
- Prevent pipe clot
- Wastewater Treatment/Sewerage
- Carpet smell
- Odour removal for paint surfaces
- Kitchen oil and grease trap
- Kitchen oil cleaning
- Any organic odour

### What is an odour?

An odour is a volatilised chemical compound, generally at a very low concentration, which humans and other animals perceive by the sense of olfaction.

Odours are normally the result of inorganic gaseous emissions (e.g. hydrogen sulphide or ammonia) or organic vapours, which are released or escape into the local environment.

Specific odours can represent a health risk. For example hydrogen sulphide gas, generated by both chemical and biological processes can be toxic.

Biology-Genesis is the most effective, cost efficient and safe solutions for immediate odour relief to some of the world's most intensive odour problems.
